Instructions:

- [Sintra Sidepanels] Mount (2) clear extrusions per sintra side panel. Each piece of extrusion will mount to the Z bracing in endframe using self tapping screws. Trim sintra according to bay depth and insert into clear channel extrusion as per diagram.
- [Wire Shelving vinyl] Tape the side of the decal to the grey sintra panel, flip the decal over and pull off the backer paper. Hold the edge of the premask and peel off the triangles used to line up the decal. Using a squeegee or ruler edge, glide from top to bottom of taped edge and apply decal with pressure to panel. Slowly peel off premask, ensuring the vinyl stays applied and discard.
- [Grey Dividers] Install to melamine wall by screwing through return leg into wall
